

L2 Learn2® MCDBA

Microsoft Certified Database Administrator Library

In today's Information Technology world, certification and training go hand in hand. Learn.com's MCDBA Library can help with the challenge of quickly getting you up to speed on important IT topics and technologies.

Learn how to install, configure, and administer Microsoft SQL Server 7.0 and Windows 2000 Server, and learn how to design and implement distributed applications with VB6. The Microsoft Certified Database Administrator sub-library addresses skill standards for MCDBA exams 70-028, 70-029, 70-175, 70-215, and 70-216.

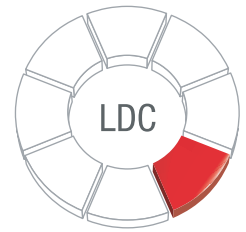

Topics Covered:

- ▶ Microsoft SQL Server 7.0
- ▶ Windows 2000 Server
- ▶ Microsoft Windows 2000 Network
- ▶ Infrastructure
- ▶ Databases with SQL Server 7.0
- ▶ VB 6

MCDBA

Microsoft Certified Database Administrator Library

Core Exams (three required)

70-028 Administering Microsoft SQL Server 7.0

Lessons

- Installing and Configuring
- Managing Databases (Part 1)
- Managing Databases (Part 2)

- Automating Tasks and Loading Data
- Replication and Server Performance

70-029 Designing and Implementing Databases with SQL Server 7.0

- Introducing SQL Server Architecture
- Retrieving Information
- Implementing Data Integrity

- Optimizing Query Performance
- Managing Data Processing
- Accessing Remote Data

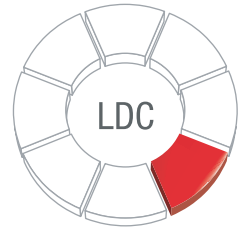

70-215 – Installing, Configuring and Administering Microsoft Windows 2000 Server

- Installing Windows 2000
Member Server
- Configuring Hardware Devices
- Managing File and Print Resources
- Configuring Storage Use
- Maintaining Windows 2000 Server
- Implementing Local Security
- Monitoring and Optimization

- Configuring Web Services
- Implementing Interoperability
- Configuring Networking Services
- Implementing Remote Access
- Sharing Resources Over the Internet
- Managing Terminal Services
- Automating Installation

MCDBA

Microsoft Certified Database Administrator Library

Elective Exams

(one required)

70-175 – Designing & Implementing Distributed Applications with VB 6

70-216 -- Implementing and Administering a Microsoft Windows 2000 Network Infrastructure

Lessons

- Debugging and Compiling Applications
- Accessing Data in Distributed Systems
- Building Components with MTS
- Creating Internet Applications
- Programming Fundamentals
- Building COM Components
- Administering DNS
- Administering DHCP
- Administering WINS
- Configuring Network Protocols
- Implementing IP Routing
- Configuring ICS and NAT
- Implementing Remote Access Services
- Implementing VPN
- Implementing Certificate Services
